

```
#include <stdio.h>
#include <sys/stat.h>

int main()
{
    printf("Linux File Access Permissions\n\n");

    printf("Users:\n");
    printf("u - Owner\n");
    printf("g - Group\n");
    printf("o - Others\n");

    printf("\nPermissions:\n");
    printf("r - Read   = 4\n");
    printf("w - Write  = 2\n");
    printf("x - Execute = 1\n");

    chmod("sample.txt", 0644);

    printf("\nPermission set to: 0644\n");
    printf("Owner  : Read, Write\n");
    printf("Group  : Read\n");
    printf("Others : Read\n");

    return 0;
}
```

OUTPUT:

Linux File Access Permissions

Users:

u - Owner

g - Group

o - Others

Permissions:

r - Read = 4

w - Write = 2

x - Execute = 1

Permission set to: 0644

Owner : Read, Write

Group : Read

Others : Read
