

```
#include <stdio.h>

int main()
{
    FILE *fp;
    char data[100];

    fp = fopen("sample.txt", "w");

    if(fp == NULL)
    {
        printf("Unable to create file.");
        return 0;
    }

    fprintf(fp, "Hello, File Management!");
    fclose(fp);

    fp = fopen("sample.txt", "r");

    if(fp == NULL)
    {
        printf("Unable to open file.");
        return 0;
    }

    fgets(data, sizeof(data), fp);

    printf("File Content: %s", data);

    fclose(fp);

    return 0;
}
```

OUTPUT:

File Content: Hello, File Management!
